Fig. 1: Diagramm of the preparation

	Weigh in:	
<pre>polyoxyethylene-660-hydroxystearate and isopropyl myristate</pre>		ydroxystearate and
•		il a clear solution is obtained
Add:		Stir until a dark-red, clear solution
beta-carotene		results
IPC: aspect		Cool to 75°C <u>+</u> 2°C
	- solve	Add: ascorbyl palmitate, alpha-toco- pherol
Add water ons	for injection in porti-	stir
,	cool to 30°C	Add:
		benzyl alcohol .
At ambient temperature, add residual water for injection		· .
		IPC: aspect, pH, density
Final soluti		ion
	Sterile filtra	tion .
		IPC: bubble point test
Aseptic filling		q
•		IPC: Filling mass; optical contaminants; check for damage of containers, closure caps, rubber stoppers
Packaging		
	•	Control of correct packaging
Final cont		trol
		IPC: aspect, filling volume, identity and contents of active ingredients, sterility
	Finished drug	×
